

# WHAT DO PEOPLE THINK OF IT?

Here is what some of our previous work experience students had to say:

“It was a really helpful week! As someone not entirely sure what job I want to do, it was good to get such a detailed insight into construction. I think my favourite part was getting to visit all the sites. It was great to learn about a broad range of things in the company and options in the construction industry for life after school.” **Sebastian Margiotta**

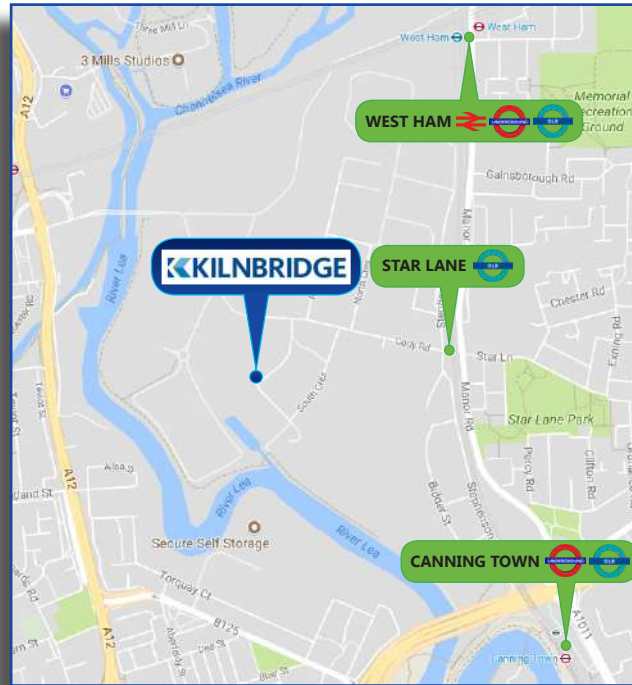

“I have had a enjoyable week, it was interesting to see all of the many different parts of the company and what takes place away from the building sites. I would say to anyone doing a placement to be ready to take in lots of information!” **Harry Smyth**

“It was good to spend time with different people in the company, you get to learn about jobs you might not have considered doing before or even heard of. I’m interested in construction but this really showed that it is an industry you can enjoy working in.” **James Richards**

# WHO ARE KILNBRIDGE?

Kilnbridge is a multi-disciplined construction and engineering company. We work on projects throughout London and the UK and our Head Office is based in Cody Road Business Park, East London. We offer services in the following:

- Construction and Civil Engineering
- Concrete Cutting and Controlled Demolition
- Demolition and Dismantling
- Fabrication
- Fire Protection
- Post-tensioning
- Waste Management

Since being founded in 1992 we have worked on a variety of projects in a range of sectors, including commercial, residential and retail areas, rail, aviation and energy. We have a reputation for being industry leaders in many of our services courtesy of our ability to complete complex projects in very challenging environments whilst placing emphasis on safety, quality and innovation.

# WORK EXPERIENCE AT KILNBRIDGE

Kilnbridge offers work experience placements for individuals who are in or have completed secondary education. Our placements are an unrivalled opportunity to learn more about our various services, departments and projects and more importantly, gain a full understanding of the construction industry. Our placements are available in **June and July for one and two week periods.**

In our regular work experience programme you will have the opportunity to learn about each of our divisions by visiting sites and projects and shadowing managers, engineers, surveyors and apprentices.

You will also be based in our Head Office to gain an insight into how Kilnbridge and our industry works and spend time with departments including Finance, IT, Business Development, HR and HSEQ. We tailor placements to your interests wherever possible and ensure you can offer feedback on your time here. To register your interest for a work experience placement, **please e-mail our HR team at [HR@Kilnbridge.com](mailto:HR@Kilnbridge.com) or fill out a work experience application form today!**

*Please note our work experience placements are unpaid and do not cover expenses.*
