

The background of the entire page is a photograph of a construction site. In the foreground, a worker is seen from the back, wearing a white hard hat with a headlamp and an orange high-visibility vest. The vest features the Kilnbridge logo and the text 'Safety in Action'. In the background, there are several tall buildings under construction, with scaffolding and cranes visible. A large concrete slab is being lifted by a crane on the right side of the image.

# Who are Kilnbridge?

Kilnbridge is a multi-disciplined construction and engineering business. We work on projects throughout the UK from our Head Office in East London and regional offices. We offer services in the following:

- Construction and Civil Engineering
- Concrete Cutting and Controlled Demolition
- Demolition and Dismantling
- Fabrication
- Fire Protection
- Post-tensioning
- Waste Management

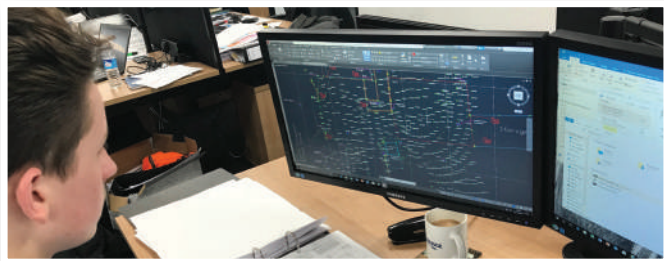

Established in 1992, we have worked on a variety of projects, earning a reputation as industry leaders in many of our services for our ability to complete complex work in very challenging environments.

## Our apprenticeships

The **Kilnbridge Apprenticeship Programme** gives you the chance to begin your career in the construction industry straight away. We offer an exciting opportunity to gain internationally recognised qualifications whilst progressing your career as an industry professional. We offer skill and degree-based apprenticeships in the following:

- Accountancy
- Administration
- Civil and Structural Engineering
- Construction Related Trades
- Design Technicians
- Fabrication Welding
- Information Technology
- Plant and Vehicle Maintenance
- Plant Logistics
- Quantity Surveying

# How does it work?

At Kilnbridge, we ensure that you will have an active role in our projects and operations from your first day. You will also be helped by our mentoring and onboarding schemes to settle into your new position.

Undergraduates completing a degree-based apprenticeship attend university for one day each week, spending the rest of the week based on site or at an office.

You are encouraged to work in as many different areas of the business as possible to help you become acquainted with your colleagues and familiar with their different roles and responsibilities.

## Apprenticeship benefits

As an apprentice at Kilnbridge, you can expect a range of benefits including:

- A competitive starting salary and progression opportunities
- In-house and external training opportunities available throughout the year
- Financial assistance for tuition fees (for those completing degree-based apprenticeships)
- Detailed performance reviews and development schemes designed to help you realise your career aspirations
- Interest free season ticket loans
- A cycle to work scheme
- Rewards from performance awards

## Applying

The applications process for our Apprenticeship Scheme opens each year in **February**. We hold telephone and face-to-face interviews in **April and May** before our new apprentices start in **September**.

For more information about the Kilnbridge Apprenticeship Programme and applying, email [HR@Kilnbridge.com](mailto:HR@Kilnbridge.com).

# What do you get to do?

"My main responsibilities include diamond drilling, track sawing, wire sawing and floor sawing. Day-to-day I also have to help towards looking after everything

on site and developing my skills through training. I have been with Kilnbridge for a while but I still feel I learn something new every day through being on site and training. The on-site guidance is also really strong."

**Chris Lamb, Concrete Cutting**

"I have worked on a variety of tasks, from receiving and inputting invoices onto the system to helping prepare the yearly financial report which the auditors

use in their annual review of the business. Working within Accounts allows you to see where money enters and leaves the company, giving you great insight into how business works."

**James Baker, Accounts Assistant**

# What do you enjoy about it?

"I enjoy the fast-paced environment, working within the construction industry and my colleagues are very friendly! I think doing this apprenticeship

will benefit my future at Kilnbridge as I will have knowledge and experience of administrative work and a good understanding of the business. Do it - being able to study and get paid is a great experience!"

**Rhea Yelland, Business Administration**

"I've been working at Kilnbridge for a year now and enjoy waking up each day and knowing that there is a new task for me to overcome. For instance, in my first

few months I came to grips with the software Kilnbridge uses and the skills required to get the most out of it. This is helping me to improve and grow my abilities over time and become an engineer."

**Kai Chalkley, Trainee Engineer**

# Words of advice

"If you keep working hard, you will get a lot back. You are rewarded for putting in time and effort during your work and training. Always listen and pay attention

and do the best you can to gain experience. Kilnbridge is very friendly and welcoming and helps you develop the determination to do well and progress so you know you will keep growing in your role."

**Eduardo Suceveanu, Fire Protection**

"Everything that gets offered to you or thrown at you – do it! When I first joined I worked on the Limmo Peninsula project, helping operatives on-site fixing

rebar and making up shutters for concrete pours. I also completed a Temporary Works Supervisor course which has massively benefited me when studying drawings and completing take offs."

**Lewis Holmes, Assistant Quantity Surveyor**
